REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or fairly suggest the present invention. Applicant claims a golf putter head comprising a main body and weighted members at each end of the head. The weighted members have a diameter substantially equivalent to the head and are comprised of a unitary solid material. The weighted members have a density greater than the density of the main body of the head. The closest prior art patents are Dippel (4,872,684) and Lee (5,632,64). With respect to Dippel, a cylindrical putter head comprising a pair of weights is disclosed. However, Dippel lacks 1) weighted members having a diameter substantially equivalent to the main body and 2) threaded rods integrally formed at the end of the weight members. With respect to Lee, a cylindrical putter head comprising a main body and weights is disclosed. However, Lee lacks the weighted members at the ends of the main body. Even considering the caps, rods, and annular weights of Lee as a weighted member (see fig 2 of Lee) the limitation in the present invention is not satisfied because the weight member is comprised of a "unitary solid" material. Lee does not disclose this limitation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
